Fluid Flow Products provides superior process equipment sales and service to the Food and Beverage industries.

Our staff of experienced application engineers and technical sales team has been helping customers solve problems for over 65 years.

We have worked with customers and manufacturers to modify, size and apply equipment for the particular needs of food and beverage processing industries. Our customers trust the long-standing tradition of superior sales and service that we are committed to providing.

**Food & Beverage Processing Applications**

**Compressed Air**

Applications:
- Plant Air Compressors & Dryers
- Point of Use Air Filtration & Drying
- Quality Control (Dew Pointers)
- Receivers & Drain Valves
- Blowdown/Blowoff with Regenerative & PD Blowers

**Equipment Controls**

Applications:
- Automated Batching Systems
- Scale Systems - Micro & Minor Ingredient
- Steam/Water Mixing & Temperature Control Valves
- Hot Oil Blending Valves
  - Process Control

**Heating Equipment**

Applications:
- Thermal Fluid Heaters, Boilers, and Hot Water Heaters for:
  - Ovens
  - Fryers
  - Pro Grills
  - Hot Water for CIP

**Pumping Equipment**

Applications:
- Marinating Tumbler - Vacuum Systems
- Evisceration Vacuum - House or Point of Use
- Offal Transfer - Vacuum (Liquid Ring or Blower)
- High Pressure CIP
- Sanitary Process - PD & Centrifugal
- Pumping Stations for Chiller Systems

**Filtration Equipment**

Applications:
- Roof Top Scrubbers
  - Venturi & Wet Style
- Self Cleaning Strainers
- Dust Collection Systems
- Process Filtration
- Cooking Oil

**The Fluid Flow Advantage**

- Factory-trained technicians available to help keep plants up and running
- Fully stocked service centers for our compressed air customers
- Computerized system control and operation data
- In-plant inspections, surveys and tests
- On-site training and technical seminars
- Customized maintenance agreements
- Preventive maintenance programs
- Life Extension Programs (upgrades)
