

Heating Systems for Hot Oil & Water

Fulton Thermal Fluid Heater

Who is selling, servicing, and supporting your heat transfer needs? At Fluid Flow Products we take pride in taking care of our customers. From the planning phases, through service and support years later, we give our utmost to see that your heaters work properly, and are well maintained. With over 40 years of sales support and factory service, we have the experience to guide you to the correct heater for your application, and to maintain that heater after installation.

Fluid Flow Products represents some of the world leaders in heating systems. Since 1971 we have represented Fulton heat transfer equipment. Fulton is a worldwide leader in engineered heating systems such as steam boilers and thermal fluid heaters. We also stay on the cutting edge of technology with products like Emech Control valves. As the world leader in ceramic disc valves and electronic closed loop control actuators, Emech Control gives you accurate digital sensing and control at the point of process.

Why Choose Fluid Flow

- Over 6 Decades of Sales Support
- Factory and Local Technical Support
- Trained Factory Service Technicians with Over 4 Decades of Experience

Who Uses Fluid Flow

- Food Processing Plants
- Pork & Poultry Plants
- Industrial Kitchens
- Beverage Plants

Samson 3-Way Valve

Expertise Product & Applications

- Thermal Fluid
- Water Wash & CIP Trim Valves
- Direct Fired Water Heaters
- Indirect Fired Water Heaters
- 2-Way Valves with Back Pressure Regulating Valves
- 3-Way Valves
- Food Grade Thermal Fluid
- System Design Overview
- Operator Training
- Upgrade Assistance
