YOUR SOLUTIONS FOR FACILITY RELIABILITY AND CAPITAL EQUIPMENT NEEDS

Compressed Air

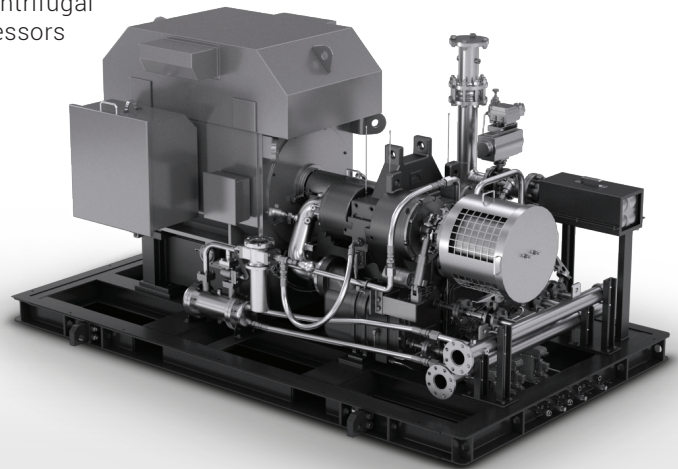

Our goal is to collaborate with operations, maintenance, reliability and project teams – all the key players involved – to recommend capital equipment and a plan that is tailored to maximize reliability, efficiency and returns on your investment.

SPXFLOW

Hanwha Air Compressors

Oil-free centrifugal air compressors

Process Equipment

Your process demands reliable equipment to provide uninterrupted, efficient operation 24/7/365. Our hot oil heaters and vacuum pumps are designed with the needs of Texas' process industries in mind.

Fulton®

Dekker Vacuum Technologies

Liquid ring, piston and rotary vane vacuum systems

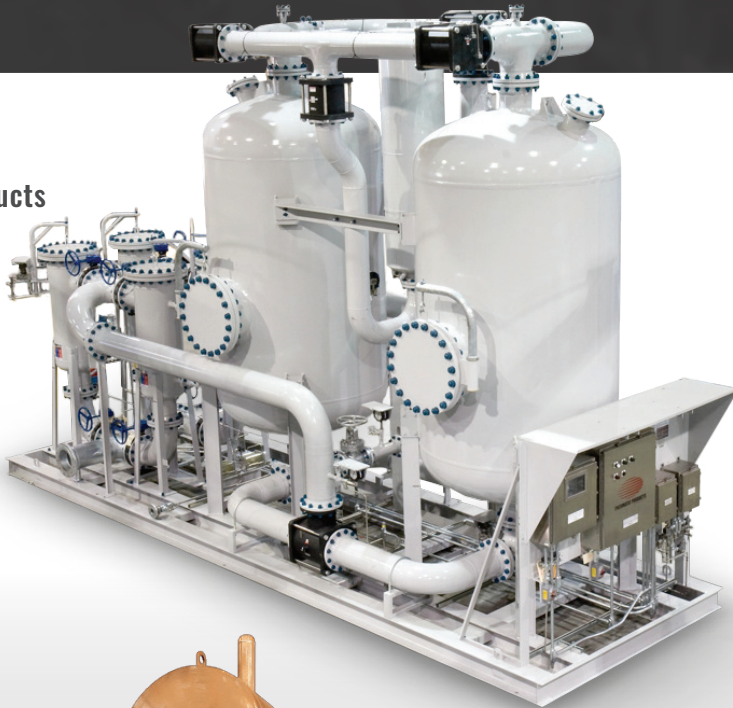

At Fluid Flow Texas, we take a data-driven and consultative approach to get a deeper understanding of your operation's unique requirements.

We know every operation that depends on compressed air and process equipment faces unique challenges – challenges that can't be solved by a one-size-fits-all, cookie-cutter approach.

SPX FLOW Pneumatic Products

Highly reliable, critical service compressed air purification equipment

Fulton Thermal Fluid (Hot Oil) Heaters

Fired thermal fluid heaters for process applications
